10/534,949 Art Unit: 3724

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Election/Restrictions

- I. Claims 1-11 and 13-14, drawn to a fruit coring device including a cutting member affixed to a handle and having a leading cutting member edge; and at least one cutting surface projecting inwardly from the cutting member and having a cutting surface edge which is located adjacent a plane defined by the cutting member edge, classified in class 30, subclass 113.1.
- II. Claim 12, 16-19, 21-22 drawn to a fruit coring device including a tubular member having an interior cavity; the first end of the tubular member being connected with the handle and the second end defining a member cutting edge; and at least one cutting blade supported within the interior cavity of the tubular member such that the blade cutting edge lies substantially in a plane defined by the member cutting edge, classified in class 30, subclass 302.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, e.g., subcombination I has a separate utility such as it could be used without the above-mentioned features set forth on invention II. Conversely, subcombination II has a separate utility such as it could be used without the above-mentioned features in invention I. See MPEP § 806.05(d).

10/534,949 Art Unit: 3724

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

- 3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification and a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
- 4. Upon the election of one of the Groups above then applicant must further elect one One the following Species.

Species I. Fig. 2;

Species II. Fig. 5;

Species III. Fig. 6;

Species IV. Fig. 7;

Species V. Fig. 8;

Species VI. Fig. 9;

Page 4

Application/Control Number:

10/534,949 Art Unit: 3724

Species VII. Fig. 10;

Species VIII. Fig. 11;

Species IX. Fig. 12;

Species X. Fig. 12B;

Species XI. Fig. 12C;

Species XII. Fig. 13;

Species XIII. Fig. 14;

Species XIV. Fig. 15;

Species XV. Fig. 16;

Species XVI. Fig. 16A;

Species XVII. Fig. 17;

Species XVIII. Fig. 18;

Species XIX. Fig. 19;

Species XX. Fig. 20;

Species XXI. Fig. 21; and

Species XXII. Fig. 22A.

The species are independent or distinct because each one of the species has at least a unique feature that is not presented in other species.

- 5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, it appears that claim 1 is generic.
- 6. Applicant is advised that a reply to this requirement must include an identification of

Application/Control Number:

10/534,949

Art Unit: 3724

the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

- 7. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
- 8. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
- 9. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
- 10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with CFR 1.48(b) if one or

10/534,949

Art Unit: 3724

more of the currently named inventors is no longer an inventor or at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

11. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR. 1.143).

Conclusion

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ghassem Alie whose telephone number is (571) 272-4501. The examiner can normally be reached on Mon-Fri 8:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Boyer Ashley can be reached on (571) 272-4502. The fax phone number for the organization where this application or proceeding is assigned is (501) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, SEE http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
